Sustainability is Us

SUSTAINABILITY IS US! We know sustainability is increasingly important to our attendees and exhibitors, as well as to our market as a whole. Running an exhibition gives us lots of opportunities to improve our impacts environmentally, socially, and economically in our host cities. We want to make our event more responsible and play a role in helping our markets improve its own sustainability through connecting people with the networks and knowledge they want to help solve the big challenges in our sector.

Help our markets through inspiring sustainable development

- Using our content to support the sustainability of the market the event serves
- Inspiring our suppliers, exhibitors and other stakeholders to deliver a sustainable event
- Developing market relevant partnerships

Run the event in an increasingly environmentally responsible manner

Reducing our event's carbon emissions

- Creating less waste
- Considering sustainability credentials of the items sourced for the event

Run the event in a socially responsible manner

- Doing business safely and ethically
- Considering wellbeing and accessibility
- Creating a positive impact on our host cities
- Measuring our impacts

Sustainability is not just a concept – it's a commitment. We are excited to introduce our sustainable efforts that will be carried out with our vision for a greener and more responsible event experience. Our sustainability commitment is reflected on the carefully curated programmes like creating platforms for dialogue among industry experts, policymakers, and local communities, ensuring that the journey towards sustainable is collaborative and inclusive.
